# CURB APPEAL

---

## Ten Tips to Update Your Home's Curb Appeal

1. **Spruce up outdoor containers:** Container plants, especially large tropicals, add considerable interest to patios and doorways where potential buyers enter and exit the house. Such displays demonstrate the endless possibilities for designing with container plants.
2. **Touch up the mulch:** Nothing spruces up a place like a new application of mulch. Apply a fresh layer in all your garden beds. The rich color enhances the contrast of the surrounding plants and makes everything pop. What's more, mulch is relatively cheap and easy to apply.
3. **Plant some instant color:** Seasonal color freshens the landscape as well and flats of annuals are relatively inexpensive. Go for a splash of several colors or a more monochromatic scheme, whatever fits in with the look of your home.
4. **Shape overgrown trees & shrubs:** Regardless of the season, it's a good idea to tackle any overlooked pruning chores because nothing says neglect like a bunch of overgrown shrubs. The idea is to show how well not only your house but your garden has been maintained. It's okay to prune deciduous trees and shrubs any time of the year.

## CURB APPEAL

---

5. **Tend to perennial beds:** Tidy up herbaceous plants, such as annuals and perennials that don't look sharp. If a plant is in such bad shape that it needs to be removed, either replace it or place a decorative pot in its place.
6. **Clean up water features:** Get rid of any visible algae, remove leaves and clean filters so that the water is crystal clear. After all, a water feature that doesn't look good or function properly can be an instant turnoff
7. **Take care of any irrigation issues:** If there are any problems with an irrigation system, fix them. Irrigation system repairs can be expensive and you don't want to lay the cost of those repairs on the buyer. Provide information about your irrigation schedule, especially if you have an automatic system. Include instructions on how the system operates and recommend the watering schedule that's worked for you.
8. **Repair faucet leaks:** A leaking faucet suggests that there may be other problems elsewhere in the plumbing. That can be an instant turn-off to buyers.
9. **Consider labeling as many plants as possible:** That way the buyer will at least know the name of each plant and can then research their growing needs. This relatively simple step can have a powerful effect on buyers, whether they're gardeners or not
10. **Power wash dirty surfaces:** Consider buying or renting a power washer to clean paved surfaces. With very little time or effort, you can make grungy, grimy surfaces look brand-spanking new. Power washers also do a great job of cleaning fences and brick or vinyl siding.
